

Aleshwaram Rahul

Software Developer | Full-Stack, Java & Node.js

Hyderabad, Telangana, India | +91 7674885265 | aleshwaramrahul@gmail.com
|---|September 2002

Professional Summary

Results-driven Software Developer with strong competencies in full-stack web development, backend microservices, and AI-driven workflow automation. Hands-on experience architecting scalable applications using Java (Spring Boot, Core Java HTTP servers), JavaScript/TypeScript (Node.js, Express, React, Next.js), and databases (PostgreSQL, MySQL, SQLite). Proven track record of developing end-to-end automation pipelines, RESTful APIs, enterprise workforce workflows, and responsive user interfaces, complemented by professional experience in technical troubleshooting and cross-functional collaboration.

Technical Skills

- **Languages:** Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Backend & Automation:** Spring Boot, Spring MVC, Node.js, Express.js, Hibernate, RESTful APIs, Supabase Edge Functions, GoTrue SMTP, node-cron, Google Gemini API
- **Frontend:** React, Next.js, Vite, Tailwind CSS, Recharts, Lucide React
- **Databases & Media:** PostgreSQL (Supabase), MySQL, SQLite (better-sqlite3), Sharp, Node Canvas
- **Developer Tools:** Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), System Design & Architecture, SDLC

Technical Projects

NexusHR (WorkforceOS) – Human Resource & Workforce Management System

Technologies: React 18, TypeScript, Vite, Tailwind CSS, Supabase (PostgreSQL), Supabase Auth / SMTP, Edge Functions

- Engineered an enterprise workforce management platform featuring Role-Based Access Control (RBAC) with dedicated Admin and Employee self-service portals.
- Implemented core modules for employee onboarding with auto-generated IDs, task lifecycle management (priority levels, status progression, comment threads), and leave approval workflows with attachments.
- Built real-time attendance tracking with automatic working hours calculation, status classification (Present, Absent, Late, Leave), and exportable workforce analytics reports.
- Integrated automated transactional email delivery using native Supabase Auth SMTP (GoTrue mailer) and Edge Functions to dispatch secure onboarding invitations, token activation links, and password reset lifecycles.
- Designed resilient state persistence combining Supabase PostgreSQL with local storage fallbacks for seamless offline/online operation.

Glowora Skincare – E-Commerce Web Application & Java Static HTTP Server

Technologies: Java 25, React 18, Vite 5, Tailwind CSS, Lucide React, JavaScript, HTML5/CSS3

- Designed and built a modern, responsive single-page e-commerce application for a botanical skincare brand featuring category filtering, product quick-view modals, and routine video showcases.
- Engineered a lightweight static HTTP server in pure Java 25 handling SPA fallback routing to serve production build distribution assets on port 8080 without external web server dependencies.
- Created custom Java build utilities (AssetExtractor, CopyLocalAssets) to organize, process, and optimize product imagery assets during the deployment pipeline.

- Implemented client-side shopping bag workflows with dynamic quantity controls, free-shipping threshold calculations, and animated order confirmation toast notifications.

JoyBoyJutsu – Autonomous AI Media Engine & Content Pipeline

Technologies: Next.js 16, React 19, Node.js, Express, Google Gemini API, SQLite, Sharp, Canvas, Instagram Graph API

- Engineered a fully autonomous multi-agent media pipeline that scrapes viral content, synthesizes structured copy via Google Gemini AI, and renders 1080×1080px carousel slides for scheduled Instagram publication.
- Built a fault-tolerant scraping engine across AniList GraphQL, Reddit, and RSS feeds using cheerio and rss-parser, applying a custom scoring algorithm to identify top trending topics.
- Developed a server-side graphics rendering engine using node-canvas and sharp to dynamically generate branded multi-slide graphics with automated layout calculation and typography.
- Automated publishing workflows via the Instagram Graph API and node-cron with transactional SQLite state tracking and an isolated sandbox preview mode.
- Designed an administrative monitoring dashboard in Next.js with Tailwind CSS and Recharts to track pipeline logs, inspect generated carousels, and review post performance metrics.

Library Management System

Technologies: Java, Spring Boot, React, MySQL, Spring Security, Hibernate

- Developed a responsive full-stack library management application utilizing React for UI and Spring Boot for backend services.
- Architected secure RESTful APIs implementing CRUD operations for book inventory, member records, and borrowing transactions.
- Configured Spring Security and JWT-based authentication to manage role-based access control (Admin/User).
- Optimized relational database schemas and indexed SQL queries in MySQL to accelerate data retrieval times.

Professional Experience

Equitron Medica Private Limited | Hyderabad, Telangana

Trainee Engineer – Customer Support | Dec 2024 – Jul 2025

- Collaborated with engineering teams and field technicians to troubleshoot and resolve client technical requirements.
- Diagnosed operational and hardware/software issues in customer-facing equipment, delivering effective technical support under tight deadlines.
- Maintained detailed maintenance logs, operational reports, and clear professional communication with clients and cross-functional teams.

Education

St. Peter's Engineering College | Hyderabad, Telangana

Bachelor of Technology (B.Tech) in Electrical and Electronics Engineering | 2022 – 2025

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Object-Oriented Programming

TKR College of Engineering & Technology | Hyderabad, Telangana

Diploma in Electrical and Electronics Engineering | 2019 – 2022

Sri Vijaya Sai High School | Nizamabad, Telangana

Secondary School Certificate (SSC) – 10th Standard | Graduated: 2019

Certifications & Technical Training

- Industrial Internship on Solar PV Systems & Automation – National Small Industries Corporation (NSIC)
- Electric Circuit Analysis: Hands-on with MultiSim Live (From Theory to Practice) – Technical Workshop
- Technical Engineering Workshop – HIEE Empowering Engineers Pvt. Ltd.

Problem Solving & Technical Development

- **Coding Platforms:** Solved 200+ coding problems across LeetCode and GeeksforGeeks, focusing on core data structures including Arrays, Strings, and Linked Lists.
- **Continuous Engineering:** Active open-source and personal project contributor focusing on clean architecture, modular REST API design, and asynchronous event handling.

Languages

- **English:** Professional Working Proficiency
- **Telugu:** Native Proficiency
- **Hindi:** Full Professional Proficiency
